The Software for Creators of Jewels

[www.rhinojewel.com](http://www.rhinojewel.com)

Rhinojewel 5.0 is the latest evolution of TechGems 4.2, a jewelry specific CAD software developed by Techjewel that has been on the market since 2001. What characterizes Rhinojewel is its emphasis on providing tools for jewelry designers and manufacturers that empower creativity and speed up workflow.

Rhinojewel is the brainchild of a team of seasoned CAD/CAM jewelry experts with a proven track record working and consulting for many of the most high profile jewelry companies in the world. Previous versions of our software have long been the number one choice of the biggest names in the industry and this highly awaited new release includes advanced knowledge deriving from Techjewel's close collaboration with industry leaders such as Solidscape and Swarovski.

Equally suitable for novice and seasoned CAD designers, Rhinojewel allows anyone to rapidly create flawless jewelry models. At the same time intermediate and advanced user have the option to customize and expand many Rhinojewel tools to create even the most complex of pieces.

Rhinojewel provides a more fluid and intuitive jewelry creation workflow and features trade-specific tools which really facilitate the daily work of jewelers and designers, boosting productivity and providing a wide range of creative solutions never before seen in jewelry.

Rhinojewel has been developed following the Rhinoceros 3D philosophy for a great product at an affordable price. For more information and to view or download demo videos, visit our website at [www.rhinojewel.com](http://www.rhinojewel.com)
